Julia Biatova

«I prefer to think that in my pictures appears not the personal me, but my interaction with the world, a wide range of aspects of life.

Inconsistency is the universal quality of the universe... In this prism forms and non-forms, abstract and real, pain and joy, creation and destruction, life and death are not contradictory ideas but equal manifestations of the constantly — moving cycle of cause and effect.

Consequently I apply this or that artistic form of expression as a means of conveying as well as possible the essence of the world in which I live and breathe.»
